Spring 2 term has approached us and, similar to Spring 1, it is a relatively short term. We have assessment week this term, and I will be sharing results with children, so that we can target learning both at home and at school in preparation for the upcoming SATs. Keep your eye out for any Parentapps regarding trips, sporting events and any other important dates for Spring 2.

A note from Mr. B and Miss K...

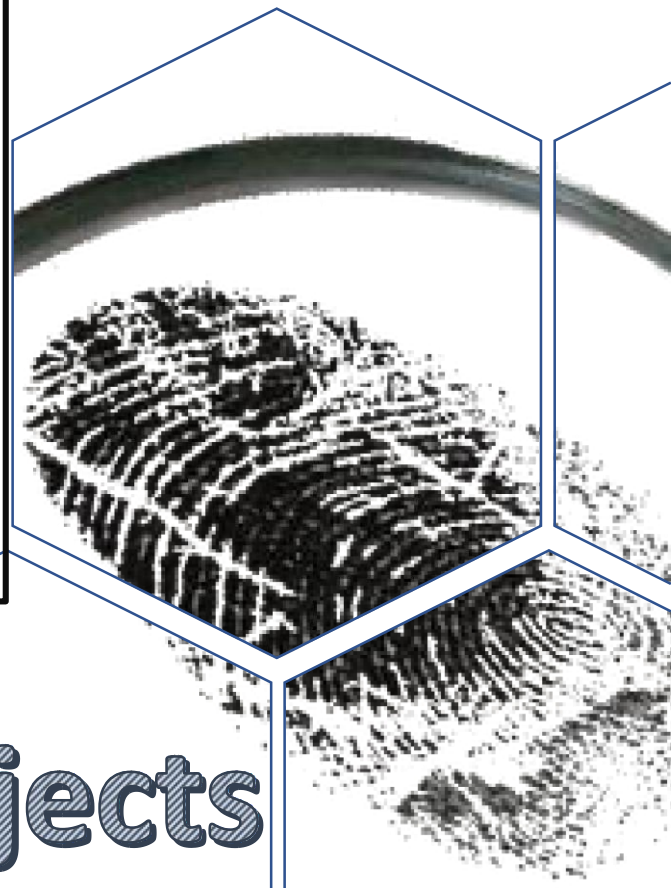

English – The London Eye Mystery.
The book
supports the study of plot, character develop
emotional response to strong themes such a
loss, self-esteem and family in narrative fictio
reader is kept in suspense throughout this hu
adventure which centres around the capital's
visitor attraction. It is a fantastic book to rea
preparation to next term's trip to our nation'
city!

RE
RE sees us exploring both Ascension and Pentecost in the preparation of the Easter celebrations. We will be reading the books of Acts, which will help us answer the deeper questions about why Christians celebrate Easter, Ascension and Pentecost in the way they do.

Subjects

History

Based on their prior learning, children will use a wide range of primary sources, artefacts and evidence to research an enquiry question of their own design. Sources will include the school log book dating back to the Victorian period, and the Preston and Broughton parish records dating back to the 1600s. They will also search for and weigh evidence in photo albums, headteachers reports and maps. Children will also have opportunities to use the graveyard and church, and prepare their own interviews with ex-pupils and a local historian. Children will prepare their own section of a museum exhibit, explaining or describing their findings, which could be opened to past and present students.

Maths

Our topics this term builds on the previous learning, continuing our mastery approach in maths.

We will start the term by looking at algebra, looking closely at substitution and algebraic formulae. This will lead on to decimals and percentages, and their relationship with fractions.

Science

In science, we will be looking closely at the classification of animals and living things. The super scientist that we will be looking at this term is Carl Linnaeus (Taxonomist).

Art

Linking with our ‘It’s a Mystery’ topic, the children will be exploring perspective and composition through drawings. They will be creating their own optical illusions using the skills taught.

Subjects

PE

PE will continue to take place on Wednesdays and Thursdays. Children are to come in to school in their PE kits on these days.
